Unleash a new kind of power with the 2017 Mini Countryman Cooper SE ALL4 PHEV. This isn't just another hybrid; it's a Mini that fuses the spirited soul of a TwinPower-Turbo Petrol engine with the instantaneous torque of an electric motor. The result? A thrilling all-wheel-drive experience with a combined 221 horsepower, delivering a powerful rush from 0 to 100 kph in just 6.7 seconds all of this while boasting a combined 2.5 L/100km equivalent when utilizing both electric and petrol power (figures from online but yours might differ depending how and where you drive!!)

The Countryman plug-in hybrid is engineered for both performance and smart efficiency. With a pure electric range ideal for shorter daily commutes, you can power your routine with zero tailpipe emissions. And when the open road calls, the gas engine kicks in to take you further, offering the freedom to explore without range anxiety. Experience the best of both
